

SAP MODULE PROGRAMME · BENGALURU & LIVE
ONLINE

SAP BASIS

System Administration

The engineer who keeps SAP running, patched, secure and fast.

2 months around 50 hours**24x7** S/4HANA server access**Live project** end to end**Weekday or weekend** online or offline

What SAP is

SAP is the software large companies run their business on. Every purchase, sale, payment, stock movement and payroll entry is recorded in one system, so finance, stores, production and sales all read the same live numbers. S/4HANA is its current generation.

What BASIS does

SAP Basis is the technical administration of the SAP landscape. Users and authorisations, transports between development, quality and production, background jobs, performance, dumps and error analysis, database and backups, patching and upgrades. No SAP customer can run without it, which is why Basis roles exist wherever SAP exists, including 24x7 support teams.

Why people learn SAP

Global demand

SAP professionals are hired across every major market, not only in India.

Used across every industry

Manufacturing, pharma, auto, FMCG, energy, retail, healthcare and services.

Roles that pay for the skill

SAP work sits with enterprise budgets, and employers price the skill accordingly.

A defined career ladder

End user, support consultant, implementation consultant, then lead or architect.

A day in the job

- Move a transport through the landscape and clean up after a failed import
- Track down why a nightly job failed and the users found out before you did
- Build a new role in PFCG, and prove the user can no longer see payroll data

Who this suits

BCA, MCA, B.Tech CS or IT

System, Linux and Windows administrators

Database administrators

Network and infrastructure engineers

IT service desk staff wanting a specialist track

Where it takes you

SAP Basis Administrator

SAP Security and Authorisations Administrator

SAP Technical Consultant

SAP Managed Services Engineer

SAP Infrastructure Engineer

Why SAP, and not the alternatives

The alternatives: The nearest equivalents are Oracle Apps DBA work and Workday or ServiceNow platform administration. Generic system administration does not transfer directly, because the SAP kernel, transports and authorisation model are specific to SAP.

Every single SAP customer needs Basis, in every industry, forever. It is the one SAP skill whose demand does not depend on which business module the customer bought. Support and managed-services companies hire in volume, including for round-the-clock shifts, which is a real entry route.

Why people pick SAP for a career

- **Where the jobs actually are.** In India, SAP is the default ERP in manufacturing, auto, pharma, FMCG, energy and the MNC captive centres. Openings for a skill follow install base, and SAP's is the largest at the enterprise end.
- **The skill travels.** SAP runs the same way at a plant in Pune and at one in Poland. A configuration skill learned once is portable across employers and countries. Smaller ERPs lock you into a small pool of employers.
- **One system, one set of numbers.** SAP is genuinely integrated. A goods receipt posts the accounting entry itself. Rival stacks often bolt separate products together, and the consultant spends life on interfaces.
- **A migration wave is running now.** SAP has said mainstream maintenance for the older ECC generation ends in 2027, with an extended option to 2030. Thousands of companies have to move to S/4HANA before that. Migration projects need consultants in every module.

What you will learn

- SAP architecture, application server, work processes, the client concept
- System landscape: development, quality, production and the transport route
- Installation and post-installation activities overview
- SAP GUI, Fiori Launchpad and system access
- User administration: SU01, user types, licence data
- Authorisations: PFCG roles, authorisation objects, troubleshooting with SU53 and ST01
- Transport management: STMS, transport requests, imports and errors
- Background job scheduling and monitoring: SM36, SM37, spool
- System monitoring: SM50, SM51, SM21, ST22 dumps, locks and updates
- Performance basics: ST02, ST03, buffer and memory analysis
- HANA database basics, backup and recovery concepts
- Patching: support packages, kernel updates, SUM and SPAM/SAINT
- Client administration: client copy, export and import
- Security fundamentals, and an overview of cloud, BTP and RISE with SAP
- End-to-end live project on real administration scenarios

The certification you are training towards

There is no direct associate certification for this scope, and we say so plainly. Details below come from SAP's own certification pages, checked on 11 August 2026. SAP can change them, so we confirm the current position when you register.

Straight answer: SAP does not currently publish an entry-level associate certification for classic Basis administration on S/4HANA. The two credentials closest to this work are C_ADBTP, SAP Certified - SAP BTP Administrator, at associate level, and E_S4CON, SAP Certified - SAP S/4HANA Conversion and SAP System Upgrade, at specialist level and aimed at people who already do conversions. We teach the Basis job the way employers actually hire for it, and if certification matters for your target role we will point you at whichever of those two fits. We will not sell you an exam that does not exist.

How we get you there

We teach this module the way employers hire for it, and we keep the certification question honest: we point you at a credential only when one genuinely fits your target role.

What makes us different

- **Trainers who are still on projects.** You are taught by people working on live SAP projects, not by full-time lecturers reading a manual. When you ask what happens at go-live, you get an answer from someone who was there last month.
- **24x7 S/4HANA server access.** Your own login on a real S/4HANA system. Practise at 6 am or at midnight, from home. Nothing is a screenshot. You do it yourself, on the real thing.
- **Doubts answered outside class.** Evenings, weekends, and between batches. You send the screenshot of the error and you get an answer, instead of waiting a week for the next class.
- **Flexible batches, online or offline.** Weekday and weekend batches, morning or evening. Learn from home or come to the centre in Hebbal, Bengaluru. Working professionals do not have to take leave.
- **A real end-to-end project.** You build the process from scratch on a live system and document it, so you have something to talk about in an interview instead of theory.
- **Certification handled properly.** We prepare you for the official SAP certification exam and help you with the booking. We are also straight with you: our completion certificate is a TGS certificate. Only SAP issues an SAP certification, and we will never blur that line.
- **Interview preparation that is specific.** Your CV rewritten the way screening software and recruiters actually read it, your LinkedIn rebuilt, and mock interviews on your own module with the questions that really get asked.
- **Job support with no fee to you.** We share profiles with employers and recruiters we talk to, and we keep working with you after the course ends. We never charge a candidate a placement fee. We also never promise a job, because nobody honestly can.
- **Help after you are hired.** New in the role and stuck on a live issue? Project support hours exist for exactly that, so your first months do not go badly.
- **Try before you commit.** A free consultation on which module fits you, and a 2-day foundation workshop before you commit to the full programme. Instalment options are available.

How the training runs

- 01 Profiling and roadmap**
We look at your background and your goal, and build the learning path around them before you pay for anything.
- 02 Core SAP concepts**
The fundamentals, explained with real business context, not definitions to memorise.
- 03 Hands-on configuration**
You configure real business scenarios yourself, step by step, on a live S/4HANA system.
- 04 Live project**
An end-to-end project that behaves like a real implementation, so you have something concrete to talk about.
- 05 Interview and placement support**
CV, LinkedIn, mock interviews on your module, and your profile put in front of employers we talk to.

What is included

- Around 50 hours of live, mentor-led training (weekday or weekend batch)
- 24x7 S/4HANA server access with your own login, so you practise from home
- End-to-end live project on real business scenarios, not slide theory
- Doubt support outside class hours, including evenings and weekends
- Configuration notes and step documents you keep after the course
- CV rewritten the way screening software and recruiters actually read it
- LinkedIn profile rewrite, step by step
- Mock interviews on your module, with the questions that actually get asked
- Guidance and booking help for the official SAP certification exam
- Online or offline (Hebbal, Bengaluru), and you can switch mode

Programmes

Programme

Foundation Workshop

2-day SAP introduction. Try before you commit.

Flagship Module Training MOST POPULAR

2 months, around 50 hours, live projects, career support.

1:1 Private Track

Private pace, fully personalised mentoring.

SAP Project Support

Already on a live SAP project? On-demand expert help, charged by the hour, with a discounted block of hours available.

Fees and instalment options are confirmed on a call, because the right programme depends on your background. Message us and we will send them the same day.

Certification

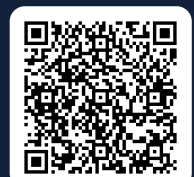

SAP publishes no direct associate certification for this scope, which is covered in full earlier in this brochure. We will not sell you an exam that does not exist, and we will point you at a credential only when one fits your target role.

Talk to us before you decide

Free consultation on which module fits your background.

Or start with the 2-day foundation workshop.
