ONLINE

SAP EWM

Extended Warehouse Management

Bin-level control of a warehouse: putaway, picking, packing, dispatch.

2 months around 50 hours**24x7** S/4HANA server access**Live project** end to end**Weekday or weekend** online or offline

What SAP is

SAP is the software large companies run their business on. Every purchase, sale, payment, stock movement and payroll entry is recorded in one system, so finance, stores, production and sales all read the same live numbers. S/4HANA is its current generation.

What EWM does

SAP EWM manages a warehouse down to the individual bin. It decides where a pallet is put away, which bin to pick from, how orders are grouped into waves, how goods are packed into handling units, and how staff are directed by scanner. It is SAP's strategic successor to the older WM module, which is why customers are migrating to it now.

Why people learn SAP

Global demand

SAP professionals are hired across every major market, not only in India.

Used across every industry

Manufacturing, pharma, auto, FMCG, energy, retail, healthcare and services.

Roles that pay for the skill

SAP work sits with enterprise budgets, and employers price the skill accordingly.

A defined career ladder

End user, support consultant, implementation consultant, then lead or architect.

A day in the job

- Design putaway and picking strategies for a new storage type
- Fix why a wave is not releasing warehouse tasks to the RF scanners
- Set up handling unit management for a customer who needs pallet-level labels

Who this suits

Warehouse and logistics staff

3PL and distribution centre teams

Supply chain graduates

Industrial engineers

MM or SD consultants adding a second skill

Where it takes you

SAP EWM Consultant

Warehouse Solution Analyst

Logistics Analyst

WMS Support Consultant

SAP Functional Consultant (EWM)

Why SAP, and not the alternatives

The alternatives: Manhattan Associates, Blue Yonder, Korber and Oracle WMS are the specialist warehouse systems. They are strong products that then need integrating with the ERP that runs everything else.

Embedded EWM ships inside S/4HANA, so warehouse execution and the ERP are one system with no interface to maintain. SAP has positioned EWM as the successor to classic WM, so every SAP customer with a warehouse has this project coming.

Why people pick SAP for a career

- **Where the jobs actually are.** In India, SAP is the default ERP in manufacturing, auto, pharma, FMCG, energy and the MNC captive centres. Openings for a skill follow install base, and SAP's is the largest at the enterprise end.
- **The skill travels.** SAP runs the same way at a plant in Pune and at one in Poland. A configuration skill learned once is portable across employers and countries. Smaller ERPs lock you into a small pool of employers.
- **One system, one set of numbers.** SAP is genuinely integrated. A goods receipt posts the accounting entry itself. Rival stacks often bolt separate products together, and the consultant spends life on interfaces.
- **A migration wave is running now.** SAP has said mainstream maintenance for the older ECC generation ends in 2027, with an extended option to 2030. Thousands of companies have to move to S/4HANA before that. Migration projects need consultants in every module.

Mapped to the SAP associate certification syllabus

Every block below is a course in SAP's own learning journey for the associate exam. The code is SAP's course code, so you can check the scope against SAP's site yourself.

Business processes Business processes in SAP EWM for S/4HANA Cloud Private Edition

- Where EWM sits against classic WM, and why customers migrate
- Embedded and decentralised deployment
- The warehouse process end to end: inbound, internal, outbound
- Integration with MM inventory management and SD deliveries

Basic customising Applying basic customising in SAP S/4HANA EWM

- Warehouse structure: warehouse number, storage type, section, bin, activity area
- Master data: product master, packaging specifications, storage bins
- Warehouse task and warehouse order creation rules
- Delivery document types and item types in EWM

Advanced customising Applying advanced customising in SAP S/4HANA EWM

- Putaway and stock removal strategies
- Storage control: process-oriented and layout-oriented
- Wave management, packing and handling unit management
- Physical inventory, posting changes and replenishment

Certification syllabus, continued

Resource management Exploring resource management in SAP EWM

- Resources, resource types and resource groups
- The RF framework and mobile data entry
- Queues, bin access types and the warehouse monitor
- Exception handling on the floor

RISE RISE with SAP methodology

- Clean core, extension options and the implementation phases
- How a warehouse go-live actually runs

EXTRA Beyond the exam, because the job needs it

- How EWM sits with MM inventory management, so you can hold both conversations
- What a WM to EWM migration project actually asks of a junior consultant
- Reading the warehouse monitor when the floor is stuck and the phone is ringing
- An end-to-end live project, documented, so you have something to show

The certification you are training towards

One associate certification covers EWM. Details below come from SAP's own certification pages, checked on 11 August 2026. SAP can change them, so we confirm the current position when you register.

The new format suits how we teach. SAP assesses you in a live system now, not only on multiple-choice questions. That is exactly how you learn here: you configure it yourself, on your own S/4HANA login, every week.

C_S4EWM

SAP Certified - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management

Level Associate, consultant role. Valid for private cloud and on-premise

Score 65% cut score, in English

Format New format: one activity, a system-based assessment

Validity Valid 12 months, extendable by assessment

What it proves you can do

- Explain the fundamental aspects of SAP EWM
- Structure the warehouse and configure its key functions
- Implement inbound and outbound processes
- Apply storage control, and implement practically in a mentored project role

SAP learning journey: Implementing Extended Warehouse Management in SAP S/4HANA Cloud, 30 hours or more

How we get you there

Straight answer on scope. SAP's own learning journey for this certification is longer than our taught hours: ours is around 50 hours on the same topic areas and the same system work, and you keep practising on your 24x7 server login between classes. We prepare you and help you register; the exam is set, run and priced by SAP, and is separate from the course fee.

What makes us different

- **Trainers who are still on projects.** You are taught by people working on live SAP projects, not by full-time lecturers reading a manual. When you ask what happens at go-live, you get an answer from someone who was there last month.
- **24x7 S/4HANA server access.** Your own login on a real S/4HANA system. Practise at 6 am or at midnight, from home. Nothing is a screenshot. You do it yourself, on the real thing.
- **Doubts answered outside class.** Evenings, weekends, and between batches. You send the screenshot of the error and you get an answer, instead of waiting a week for the next class.
- **Flexible batches, online or offline.** Weekday and weekend batches, morning or evening. Learn from home or come to the centre in Hebbal, Bengaluru. Working professionals do not have to take leave.
- **A real end-to-end project.** You build the process from scratch on a live system and document it, so you have something to talk about in an interview instead of theory.
- **Certification handled properly.** We prepare you for the official SAP certification exam and help you with the booking. We are also straight with you: our completion certificate is a TGS certificate. Only SAP issues an SAP certification, and we will never blur that line.
- **Interview preparation that is specific.** Your CV rewritten the way screening software and recruiters actually read it, your LinkedIn rebuilt, and mock interviews on your own module with the questions that really get asked.
- **Job support with no fee to you.** We share profiles with employers and recruiters we talk to, and we keep working with you after the course ends. We never charge a candidate a placement fee. We also never promise a job, because nobody honestly can.
- **Help after you are hired.** New in the role and stuck on a live issue? Project support hours exist for exactly that, so your first months do not go badly.
- **Try before you commit.** A free consultation on which module fits you, and a 2-day foundation workshop before you commit to the full programme. Instalment options are available.

How the training runs

- 01 Profiling and roadmap**
We look at your background and your goal, and build the learning path around them before you pay for anything.
- 02 Core SAP concepts**
The fundamentals, explained with real business context, not definitions to memorise.
- 03 Hands-on configuration**
You configure real business scenarios yourself, step by step, on a live S/4HANA system.
- 04 Live project**
An end-to-end project that behaves like a real implementation, so you have something concrete to talk about.
- 05 Interview and placement support**
CV, LinkedIn, mock interviews on your module, and your profile put in front of employers we talk to.

What is included

- Around 50 hours of live, mentor-led training (weekday or weekend batch)
- 24x7 S/4HANA server access with your own login, so you practise from home
- End-to-end live project on real business scenarios, not slide theory
- Doubt support outside class hours, including evenings and weekends
- Configuration notes and step documents you keep after the course
- CV rewritten the way screening software and recruiters actually read it
- LinkedIn profile rewrite, step by step
- Mock interviews on your module, with the questions that actually get asked
- Guidance and booking help for the official SAP certification exam
- Online or offline (Hebbal, Bengaluru), and you can switch mode

Programmes

Programme

Foundation Workshop

2-day SAP introduction. Try before you commit.

Flagship Module Training MOST POPULAR

2 months, around 50 hours, live projects, career support.

1:1 Private Track

Private pace, fully personalised mentoring.

SAP Project Support

Already on a live SAP project? On-demand expert help, charged by the hour, with a discounted block of hours available.

Fees and instalment options are confirmed on a call, because the right programme depends on your background. Message us and we will send them the same day.

Certification

You are training towards the SAP associate certification C_S4EWM, covered earlier in this brochure. We prepare you against SAP's current syllabus and help you register. The exam is set, run and priced by SAP, and is separate from the course fee.
