

SAP MODULE PROGRAMME · BENGALURU & LIVE
ONLINE

SAP FICO

Finance and Controlling

The money side of SAP: every rupee in, out and accounted for.

2 months around 50 hours**24x7** S/4HANA server access**Live project** end to end**Weekday or weekend** online or offline

What SAP is

SAP is the software large companies run their business on. Every purchase, sale, payment, stock movement and payroll entry is recorded in one system, so finance, stores, production and sales all read the same live numbers. S/4HANA is its current generation.

What FICO does

SAP FICO records the financial life of the company. FI is external accounting: general ledger, payables, receivables, assets, taxes, bank and statutory reporting. CO is internal: what each cost centre, product and project actually costs. Every purchase, sale and stock movement anywhere in SAP ends up here as an accounting document.

Why people learn SAP

Global demand

SAP professionals are hired across every major market, not only in India.

Used across every industry

Manufacturing, pharma, auto, FMCG, energy, retail, healthcare and services.

Roles that pay for the skill

SAP work sits with enterprise budgets, and employers price the skill accordingly.

A defined career ladder

End user, support consultant, implementation consultant, then lead or architect.

A day in the job

- Set up a new company code and chart of accounts for a plant that just opened
- Fix why a vendor invoice is not matching the purchase order and the goods receipt
- Close the month: post accruals, run depreciation, and get the reports out

Who this suits

B.Com / M.Com

CA, CMA, CS (including inter)

MBA Finance

Accountants and Tally users

AP, AR and GL executives

Auditors and finance analysts

Where it takes you

SAP FICO Consultant

SAP Finance End User

Financial Reporting Analyst

S/4HANA Finance Functional Consultant

AP / AR / GL Analyst (SAP)

Why SAP, and not the alternatives

The alternatives: Oracle Fusion Financials and NetSuite, Microsoft Dynamics 365 Finance, Workday Financials, and at the small end Tally, Zoho Books and QuickBooks.

In S/4HANA, FI and CO sit in one table (the Universal Journal), so finance and costing stop disagreeing and reconciliation work disappears. Indian GST localisation is standard and maintained by SAP. Rival stacks usually still reconcile two ledgers.

Why people pick SAP for a career

- **Where the jobs actually are.** In India, SAP is the default ERP in manufacturing, auto, pharma, FMCG, energy and the MNC captive centres. Openings for a skill follow install base, and SAP's is the largest at the enterprise end.
- **The skill travels.** SAP runs the same way at a plant in Pune and at one in Poland. A configuration skill learned once is portable across employers and countries. Smaller ERPs lock you into a small pool of employers.
- **One system, one set of numbers.** SAP is genuinely integrated. A goods receipt posts the accounting entry itself. Rival stacks often bolt separate products together, and the consultant spends life on interfaces.
- **A migration wave is running now.** SAP has said mainstream maintenance for the older ECC generation ends in 2027, with an extended option to 2030. Thousands of companies have to move to S/4HANA before that. Migration projects need consultants in every module.

Mapped to the SAP associate certification syllabus

Every block below is a course in SAP's own learning journey for the associate exam. The code is SAP's course code, so you can check the scope against SAP's site yourself.

S4F12 Customising core settings in Financial Accounting

- Organisational units: company code, ledgers, currencies, fiscal year variant
- General ledger master data, account groups, field status, chart of accounts
- Customer and vendor master data as business partners
- Document control and posting control: document types, number ranges, tolerances, posting keys, taxes
- Document clearing: open item management, partial and residual payments, cross-company code postings

S4F13 Configuring additional settings in Financial Accounting

- Automatic payment program: configuration and payment run
- Automatic dunning program and correspondence
- Document parking and additional posting options
- Special general ledger transactions: down payments, guarantees
- Validations and substitutions, and the financial part of data archiving

S4F15 Configuring the financial closing

- Month-end and year-end close in Financial Accounting
- Accruals and provisions, foreign currency valuation
- Balance sheet and profit and loss statement, financial statement versions
- Posting period control and the closing cockpit
- Receivables and payables regrouping and reconciliation

S4F17 Configuring Asset Accounting

- Chart of depreciation, depreciation areas and parallel valuation
- Asset classes, account determination and asset master data
- Acquisitions, transfers, retirements and asset under construction
- Depreciation methods and the depreciation run
- Asset year-end close and asset reporting

Certification syllabus, continued

S4F22 Cost centre and internal order accounting (Controlling)

- Controlling area, cost elements, cost centres and activity types
- Statistical key figures and cost centre planning
- Period-end allocations: distribution, assessment, overhead
- Internal orders: types, budgeting, settlement
- Overhead cost reporting

S4F23 / S4F25 Product cost planning and cost object controlling

- Material cost estimate with and without quantity structure
- Costing variants, valuation variants and cost component structure
- Cost object controlling: preliminary, simultaneous and period-end costing
- Work in progress, variance calculation and settlement

S4F28 / S4F29 Profit centre accounting and profitability analysis

- Profit centre master data, assignments and documents
- Transfer prices and profit centre reporting
- Account-based profitability analysis in the Universal Journal
- Characteristics, value fields and CO-PA reporting

S4C03 Implementing SAP S/4HANA Cloud Private Edition

- S/4HANA scope, deployment options and the HANA architecture
- The Universal Journal (ACDOCA) and what changed from ECC
- Fiori launchpad, apps and embedded analytics
- RISE with SAP methodology, clean core and the implementation phases

EXTRA Beyond the exam, because the job needs it

- Indian localisation: GST configuration, tax codes and statutory reporting
- Integration you will be asked about in interviews: automatic account determination from MM (OBYC) and revenue account determination from SD
- Bank accounting, house banks and bank reconciliation as run in Indian companies
- An end-to-end live project, documented, so you have something to show

The certification you are training towards

Two associate certifications cover FICO. Details below come from SAP's own certification pages, checked on 11 August 2026. SAP can change them, so we confirm the current position when you register.

The new format suits how we teach. SAP assesses you in a live system now, not only on multiple-choice questions. That is exactly how you learn here: you configure it yourself, on your own S/4HANA login, every week.

C_TS4FI

SAP Certified - SAP S/4HANA Cloud Private Edition, Financial Accounting

Level Associate, consultant role

Format New format: one activity, a system-based assessment. You work in a real system, you do not only answer multiple-choice questions.

Score 60% cut score, in English

Validity Valid 12 months, extended another 12 months each time you pass an assessment

What it proves you can do

- Customise and perform Financial Accounting organisational units and master data
- Customise and perform General Ledger, Accounts Payable, Accounts Receivable and Asset Accounting
- Customise and perform period-end and year-end entity close in Financial Accounting
- Customise and perform Financial Accounting reporting

SAP learning journey: Implementing Financial Accounting in SAP S/4HANA, 6 courses, 77 hours or more

C_TS4CO

SAP Certified - SAP S/4HANA Cloud Private Edition, Management Accounting

Level Associate, consultant role

Format New format: one activity, a system-based assessment

Score 60% cut score, in English

Validity Valid 12 months, extendable by assessment

What it proves you can do

- Customise and perform Management Accounting organisational units and master data
- Customise and perform overhead cost accounting, product cost planning, cost object controlling and profitability analysis
- Customise and perform periodic activities in Management Accounting
- Customise and perform Management Accounting reporting

SAP learning journey: Implementing Management Accounting in SAP S/4HANA, 7 courses, 106 hours or more

How we get you there

Straight answer on scope. SAP's own journey is 77 hours or more for Financial Accounting and 106 for Management Accounting. Ours is around 50 taught hours on the same topic areas and the same system work, so you keep practising on your 24x7 server login between classes. Most learners sit Financial Accounting first and add Management Accounting later. We prepare you and help you register; the exam is set, run and priced by SAP.

What makes us different

- **Trainers who are still on projects.** You are taught by people working on live SAP projects, not by full-time lecturers reading a manual. When you ask what happens at go-live, you get an answer from someone who was there last month.
- **24x7 S/4HANA server access.** Your own login on a real S/4HANA system. Practise at 6 am or at midnight, from home. Nothing is a screenshot. You do it yourself, on the real thing.
- **Doubts answered outside class.** Evenings, weekends, and between batches. You send the screenshot of the error and you get an answer, instead of waiting a week for the next class.
- **Flexible batches, online or offline.** Weekday and weekend batches, morning or evening. Learn from home or come to the centre in Hebbal, Bengaluru. Working professionals do not have to take leave.
- **A real end-to-end project.** You build the process from scratch on a live system and document it, so you have something to talk about in an interview instead of theory.
- **Certification handled properly.** We prepare you for the official SAP certification exam and help you with the booking. We are also straight with you: our completion certificate is a TGS certificate. Only SAP issues an SAP certification, and we will never blur that line.
- **Interview preparation that is specific.** Your CV rewritten the way screening software and recruiters actually read it, your LinkedIn rebuilt, and mock interviews on your own module with the questions that really get asked.
- **Job support with no fee to you.** We share profiles with employers and recruiters we talk to, and we keep working with you after the course ends. We never charge a candidate a placement fee. We also never promise a job, because nobody honestly can.
- **Help after you are hired.** New in the role and stuck on a live issue? Project support hours exist for exactly that, so your first months do not go badly.
- **Try before you commit.** A free consultation on which module fits you, and a 2-day foundation workshop before you commit to the full programme. Instalment options are available.

How the training runs

- 01 Profiling and roadmap**
We look at your background and your goal, and build the learning path around them before you pay for anything.
- 02 Core SAP concepts**
The fundamentals, explained with real business context, not definitions to memorise.
- 03 Hands-on configuration**
You configure real business scenarios yourself, step by step, on a live S/4HANA system.
- 04 Live project**
An end-to-end project that behaves like a real implementation, so you have something concrete to talk about.
- 05 Interview and placement support**
CV, LinkedIn, mock interviews on your module, and your profile put in front of employers we talk to.

What is included

- Around 50 hours of live, mentor-led training (weekday or weekend batch)
- 24x7 S/4HANA server access with your own login, so you practise from home
- End-to-end live project on real business scenarios, not slide theory
- Doubt support outside class hours, including evenings and weekends
- Configuration notes and step documents you keep after the course
- CV rewritten the way screening software and recruiters actually read it
- LinkedIn profile rewrite, step by step
- Mock interviews on your module, with the questions that actually get asked
- Guidance and booking help for the official SAP certification exam
- Online or offline (Hebbal, Bengaluru), and you can switch mode

Programmes

Programme

Foundation Workshop

2-day SAP introduction. Try before you commit.

Flagship Module Training MOST POPULAR

2 months, around 50 hours, live projects, career support.

1:1 Private Track

Private pace, fully personalised mentoring.

SAP Project Support

Already on a live SAP project? On-demand expert help, charged by the hour, with a discounted block of hours available.

Fees and instalment options are confirmed on a call, because the right programme depends on your background. Message us and we will send them the same day.

Certification

You are training towards the SAP associate certifications C_TS4FI and C_TS4CO, covered earlier in this brochure. We prepare you against SAP's current syllabus and help you register. The exam is set, run and priced by SAP, and is separate from the course fee.

Talk to us before you decide
