ONLINE

SAP MM

Materials Management

Buying, receiving and holding stock, from purchase request to payment.

2 months around 50 hours**24x7** S/4HANA server access**Live project** end to end**Weekday or weekend** online or offline

What SAP is

SAP is the software large companies run their business on. Every purchase, sale, payment, stock movement and payroll entry is recorded in one system, so finance, stores, production and sales all read the same live numbers. S/4HANA is its current generation.

What MM does

SAP MM runs procurement and inventory. It covers what the company buys, from whom, at what price, when it arrives, where it is stored, what it is worth, and how the vendor gets paid. It is the highest-volume functional area in Indian manufacturing, and it feeds finance on every single movement.

Why people learn SAP

Global demand

SAP professionals are hired across every major market, not only in India.

Roles that pay for the skill

SAP work sits with enterprise budgets, and employers price the skill accordingly.

Used across every industry

Manufacturing, pharma, auto, FMCG, energy, retail, healthcare and services.

A defined career ladder

End user, support consultant, implementation consultant, then lead or architect.

A day in the job

- Build a release strategy so purchase orders above a value need manager approval
- Find out why a goods receipt posted to the wrong GL account (account determination)
- Set up subcontracting for a vendor who does machining on our own material

Who this suits

Supply chain and logistics graduates

MBA Supply Chain or Operations

Purchase, stores and inventory executives

Mechanical and industrial engineers

Warehouse and plant staff

Any graduate targeting procurement

Where it takes you

SAP MM Consultant

Procurement Analyst

Inventory / Materials Manager

Logistics and SCM Analyst

SAP Functional Consultant (MM)

Why SAP, and not the alternatives

The alternatives: Oracle Procurement Cloud, Coupa, Jaggaer, Zycus, Ivalua and Microsoft Dynamics 365 Supply Chain. Most are procurement-only tools that then have to be interfaced back to an ERP.

MM is not a separate purchasing tool bolted on. A goods receipt in MM posts the stock value and the accounting entry itself, and MRP, production and sales read the same stock in real time. That integration is what standalone procurement suites spend their lives rebuilding.

Why people pick SAP for a career

- **Where the jobs actually are.** In India, SAP is the default ERP in manufacturing, auto, pharma, FMCG, energy and the MNC captive centres. Openings for a skill follow install base, and SAP's is the largest at the enterprise end.
- **The skill travels.** SAP runs the same way at a plant in Pune and at one in Poland. A configuration skill learned once is portable across employers and countries. Smaller ERPs lock you into a small pool of employers.
- **One system, one set of numbers.** SAP is genuinely integrated. A goods receipt posts the accounting entry itself. Rival stacks often bolt separate products together, and the consultant spends life on interfaces.
- **A migration wave is running now.** SAP has said mainstream maintenance for the older ECC generation ends in 2027, with an extended option to 2030. Thousands of companies have to move to S/4HANA before that. Migration projects need consultants in every module.

Mapped to the SAP associate certification syllabus

Every block below is a course in SAP's own learning journey for the associate exam. The code is SAP's course code, so you can check the scope against SAP's site yourself.

S4500 Business processes in Sourcing and Procurement

- The procure-to-pay cycle end to end and the documents at each step
- Organisation structure: company code, plant, storage location, purchasing organisation
- Material master and the Business Partner as vendor in S/4HANA
- Self-service requisitioning and the Fiori procurement apps

S4520 Purchasing in SAP S/4HANA

- Purchase requisitions, RFQs, purchase orders and order types
- Info records, source lists, quota arrangements and source determination
- Outline agreements: contracts and scheduling agreements
- Release strategies and approval workflow
- Pricing in purchasing: condition technique and condition types
- Special procurement: subcontracting, consignment, stock transport orders

S4510 Inventory management and physical inventory

- Goods receipt, goods issue, transfer postings and movement types
- Stock types: unrestricted, quality inspection, blocked
- Reservations, goods movements for production and cost centres
- Physical inventory, cycle counting and differences

S4515 Invoice verification

- Three-way match: purchase order, goods receipt, invoice
- Invoice blocking, release, tolerances and variances
- Credit memos, subsequent debits and planned delivery costs
- Evaluated receipt settlement

Certification syllabus, continued

S4550 Cross-functional customising in Materials Management

- Material types, number ranges and field selection
- Valuation, valuation classes and split valuation
- Automatic account determination (OBYC) and the link to Financial Accounting
- Document types, number ranges and message output

Planning Consumption-based planning and forecasting

- Reorder point planning, forecast-based and time-phased planning
- Lot-sizing procedures and safety stock
- MRP run and the MRP controller's daily work

S4C03 Implementing SAP S/4HANA Cloud Private Edition

- S/4HANA scope, deployment options and the HANA architecture
- What changed in MM under S/4HANA: Business Partner, material number length, MM-IM
- Fiori launchpad, apps and embedded analytics
- RISE with SAP methodology, clean core and the implementation phases

EXTRA Beyond the exam, because the job needs it

- Indian GST on purchasing: tax codes, input credit and the postings it creates
- The classic transaction codes support teams still live in: ME21N, MIGO, MIRO, MB52
- Reading an OBYC account determination error the way a support ticket describes it
- An end-to-end live project, documented, so you have something to show

The certification you are training towards

One associate certification covers MM. Details below come from SAP's own certification pages, checked on 11 August 2026. SAP can change them, so we confirm the current position when you register.

The new format suits how we teach. SAP assesses you in a live system now, not only on multiple-choice questions. That is exactly how you learn here: you configure it yourself, on your own S/4HANA login, every week.

C_TS452

SAP Certified - SAP S/4HANA Cloud Private Edition, Sourcing and Procurement

Level Associate, consultant role. Valid for private cloud and on-premise

Score 76% cut score, in English

Format New format: one activity, a system-based assessment. You work in a real system, not only on multiple-choice questions.

Validity Valid 12 months, extended another 12 months each time you pass an assessment

What it proves you can do

- Core skills in the sourcing and procurement line of business
- Master data, basic configuration and procurement workflows
- Core procurement processes: requisitioning, purchasing, sourcing, contracts
- Deploy, adopt and extend S/4HANA Cloud Private Edition as a project team member

SAP learning journey: Implementing SAP S/4HANA Cloud Private Edition, Sourcing and Procurement, 93 hours or more

How we get you there

Straight answer on scope. SAP's own learning journey for this certification is longer than our taught hours: ours is around 50 hours on the same topic areas and the same system work, and you keep practising on your 24x7 server login between classes. We prepare you and help you register; the exam is set, run and priced by SAP, and is separate from the course fee.

What makes us different

- **Trainers who are still on projects.** You are taught by people working on live SAP projects, not by full-time lecturers reading a manual. When you ask what happens at go-live, you get an answer from someone who was there last month.
- **24x7 S/4HANA server access.** Your own login on a real S/4HANA system. Practise at 6 am or at midnight, from home. Nothing is a screenshot. You do it yourself, on the real thing.
- **Doubts answered outside class.** Evenings, weekends, and between batches. You send the screenshot of the error and you get an answer, instead of waiting a week for the next class.
- **Flexible batches, online or offline.** Weekday and weekend batches, morning or evening. Learn from home or come to the centre in Hebbal, Bengaluru. Working professionals do not have to take leave.
- **A real end-to-end project.** You build the process from scratch on a live system and document it, so you have something to talk about in an interview instead of theory.
- **Certification handled properly.** We prepare you for the official SAP certification exam and help you with the booking. We are also straight with you: our completion certificate is a TGS certificate. Only SAP issues an SAP certification, and we will never blur that line.
- **Interview preparation that is specific.** Your CV rewritten the way screening software and recruiters actually read it, your LinkedIn rebuilt, and mock interviews on your own module with the questions that really get asked.
- **Job support with no fee to you.** We share profiles with employers and recruiters we talk to, and we keep working with you after the course ends. We never charge a candidate a placement fee. We also never promise a job, because nobody honestly can.
- **Help after you are hired.** New in the role and stuck on a live issue? Project support hours exist for exactly that, so your first months do not go badly.
- **Try before you commit.** A free consultation on which module fits you, and a 2-day foundation workshop before you commit to the full programme. Instalment options are available.

How the training runs

- 01 Profiling and roadmap**
We look at your background and your goal, and build the learning path around them before you pay for anything.
- 02 Core SAP concepts**
The fundamentals, explained with real business context, not definitions to memorise.
- 03 Hands-on configuration**
You configure real business scenarios yourself, step by step, on a live S/4HANA system.
- 04 Live project**
An end-to-end project that behaves like a real implementation, so you have something concrete to talk about.
- 05 Interview and placement support**
CV, LinkedIn, mock interviews on your module, and your profile put in front of employers we talk to.

What is included

- Around 50 hours of live, mentor-led training (weekday or weekend batch)
- 24x7 S/4HANA server access with your own login, so you practise from home
- End-to-end live project on real business scenarios, not slide theory
- Doubt support outside class hours, including evenings and weekends
- Configuration notes and step documents you keep after the course
- CV rewritten the way screening software and recruiters actually read it
- LinkedIn profile rewrite, step by step
- Mock interviews on your module, with the questions that actually get asked
- Guidance and booking help for the official SAP certification exam
- Online or offline (Hebbal, Bengaluru), and you can switch mode

Programmes

Programme

Foundation Workshop

2-day SAP introduction. Try before you commit.

Flagship Module Training MOST POPULAR

2 months, around 50 hours, live projects, career support.

1:1 Private Track

Private pace, fully personalised mentoring.

SAP Project Support

Already on a live SAP project? On-demand expert help, charged by the hour, with a discounted block of hours available.

Fees and instalment options are confirmed on a call, because the right programme depends on your background. Message us and we will send them the same day.

Certification

You are training towards the SAP associate certification C_TS452, covered earlier in this brochure. We prepare you against SAP's current syllabus and help you register. The exam is set, run and priced by SAP, and is separate from the course fee.
