

SAP MODULE PROGRAMME · BENGALURU & LIVE
ONLINE

SAP PP

Production Planning

What to make, how much, on which machine, by when.

2 months around 50 hours

24x7 S/4HANA server access

Live project end to end

Weekday or weekend online or offline

What SAP is

SAP is the software large companies run their business on. Every purchase, sale, payment, stock movement and payroll entry is recorded in one system, so finance, stores, production and sales all read the same live numbers. S/4HANA is its current generation.

What PP does

SAP PP plans and controls manufacturing. It holds the recipe (bill of materials), the process steps (routing), the machines (work centres), and it runs MRP to work out what must be bought and produced to meet demand. Then it tracks the production order on the shop floor until the finished goods are in stock.

Why people learn SAP

Global demand

SAP professionals are hired across every major market, not only in India.

Used across every industry

Manufacturing, pharma, auto, FMCG, energy, retail, healthcare and services.

Roles that pay for the skill

SAP work sits with enterprise budgets, and employers price the skill accordingly.

A defined career ladder

End user, support consultant, implementation consultant, then lead or architect.

A day in the job

- Run MRP and explain to planning why a component is short next Tuesday
- Create a production version for a new line and test the routing timings
- Chase why a production order is not settling to the right cost object

Who this suits

Mechanical, production and industrial engineers

Manufacturing supervisors and planners

Diploma holders with plant experience

Operations and PPC teams

MBA Operations

Where it takes you

SAP PP Consultant

Production Planner

MRP Controller

Operations Planning Analyst

SAP Functional Consultant (PP)

Why SAP, and not the alternatives

The alternatives: Oracle SCM Cloud, Microsoft Dynamics 365 Supply Chain, Infor CloudSuite Industrial, Siemens Opcenter and other MES tools, and Ramco in India.

PP is planning and execution wired straight into stock, costing and procurement. MES tools control machines but still need an ERP behind them. In Indian manufacturing, SAP is the ERP behind them, and PP consultants are scarcer than MM ones.

Why people pick SAP for a career

- **Where the jobs actually are.** In India, SAP is the default ERP in manufacturing, auto, pharma, FMCG, energy and the MNC captive centres. Openings for a skill follow install base, and SAP's is the largest at the enterprise end.
- **The skill travels.** SAP runs the same way at a plant in Pune and at one in Poland. A configuration skill learned once is portable across employers and countries. Smaller ERPs lock you into a small pool of employers.
- **One system, one set of numbers.** SAP is genuinely integrated. A goods receipt posts the accounting entry itself. Rival stacks often bolt separate products together, and the consultant spends life on interfaces.
- **A migration wave is running now.** SAP has said mainstream maintenance for the older ECC generation ends in 2027, with an extended option to 2030. Thousands of companies have to move to S/4HANA before that. Migration projects need consultants in every module.

Mapped to the SAP associate certification syllabus

Every block below is a course in SAP's own learning journey for the associate exam. The code is SAP's course code, so you can check the scope against SAP's site yourself.

Basics Discovering the basics of SAP S/4HANA Manufacturing

- The manufacturing landscape: discrete, process and repetitive
- Organisation structure: plant, storage location, work centre, MRP controller
- How PP connects to MM, SD, QM and Controlling

Master data Basic data for manufacturing and product management

- Material master MRP and work scheduling views
- Bill of materials, routings and work centres or resources
- Production versions, and master recipes for process industries

Planning Exploring production planning in SAP S/4HANA

- Demand management and planned independent requirements
- Make-to-order and make-to-stock planning strategies
- MRP run, MRP Live, lot sizing and exception messages
- Planned orders, conversion and the stock requirements list

Certification syllabus, continued

Advanced Advanced planning with PP/DS, and capacity planning

- pMRP, DDMRP and PP/DS in S/4HANA
- Detailed scheduling, optimisation and the planning board
- Capacity evaluation and levelling

S4260 Managing production orders

- Production order lifecycle: create, release, print, confirm, technically complete
- Goods issue to order, backflushing and goods receipt from order
- Process orders and process management for process industries
- Order settlement, variances and the link to product costing

S4C03 Implementing SAP S/4HANA Cloud Private Edition

- S/4HANA scope, deployment options and the HANA architecture
- Fiori launchpad, manufacturing apps and embedded analytics
- RISE with SAP methodology, clean core and the implementation phases

EXTRA Beyond the exam, because the job needs it

- Reading MD04 the way a planner reads it, not the way a book explains it
- Where PP touches costing, so you can answer a Controlling question in an interview
- Shop-floor reality: confirmations, scrap, rework and why the system says short
- An end-to-end live project, documented, so you have something to show

The certification you are training towards

One associate certification covers PP. Details below come from SAP's own certification pages, checked on 11 August 2026. SAP can change them, so we confirm the current position when you register.

The new format suits how we teach. SAP assesses you in a live system now, not only on multiple-choice questions. That is exactly how you learn here: you configure it yourself, on your own S/4HANA login, every week.

C_TS422

SAP Certified - SAP S/4HANA Cloud Private Edition, Production Planning and Manufacturing

Level Associate, consultant role. Valid for private cloud and on-premise

Format New format: one activity, a system-based assessment

Score 64% cut score, in English

Validity Valid 12 months, extendable by assessment

What it proves you can do

- Analyse and maintain master data for discrete and process manufacturing
- Run material requirements planning and capacity evaluation
- Apply make-to-order and make-to-stock planning strategies
- Use advanced planning: pMRP, MRP Live, DDMRP and PP/DS, and detailed scheduling
- Describe and manage the production and process order lifecycle

SAP learning journey: Implementing Manufacturing in SAP S/4HANA Cloud Private Edition, 77 hours or more

How we get you there

Straight answer on scope. SAP's own learning journey for this certification is longer than our taught hours: ours is around 50 hours on the same topic areas and the same system work, and you keep practising on your 24x7 server login between classes. We prepare you and help you register; the exam is set, run and priced by SAP, and is separate from the course fee.

What makes us different

- **Trainers who are still on projects.** You are taught by people working on live SAP projects, not by full-time lecturers reading a manual. When you ask what happens at go-live, you get an answer from someone who was there last month.
- **24x7 S/4HANA server access.** Your own login on a real S/4HANA system. Practise at 6 am or at midnight, from home. Nothing is a screenshot. You do it yourself, on the real thing.
- **Doubts answered outside class.** Evenings, weekends, and between batches. You send the screenshot of the error and you get an answer, instead of waiting a week for the next class.
- **Flexible batches, online or offline.** Weekday and weekend batches, morning or evening. Learn from home or come to the centre in Hebbal, Bengaluru. Working professionals do not have to take leave.
- **A real end-to-end project.** You build the process from scratch on a live system and document it, so you have something to talk about in an interview instead of theory.
- **Certification handled properly.** We prepare you for the official SAP certification exam and help you with the booking. We are also straight with you: our completion certificate is a TGS certificate. Only SAP issues an SAP certification, and we will never blur that line.
- **Interview preparation that is specific.** Your CV rewritten the way screening software and recruiters actually read it, your LinkedIn rebuilt, and mock interviews on your own module with the questions that really get asked.
- **Job support with no fee to you.** We share profiles with employers and recruiters we talk to, and we keep working with you after the course ends. We never charge a candidate a placement fee. We also never promise a job, because nobody honestly can.
- **Help after you are hired.** New in the role and stuck on a live issue? Project support hours exist for exactly that, so your first months do not go badly.
- **Try before you commit.** A free consultation on which module fits you, and a 2-day foundation workshop before you commit to the full programme. Instalment options are available.

How the training runs

- 01 Profiling and roadmap**
We look at your background and your goal, and build the learning path around them before you pay for anything.
- 02 Core SAP concepts**
The fundamentals, explained with real business context, not definitions to memorise.
- 03 Hands-on configuration**
You configure real business scenarios yourself, step by step, on a live S/4HANA system.
- 04 Live project**
An end-to-end project that behaves like a real implementation, so you have something concrete to talk about.
- 05 Interview and placement support**
CV, LinkedIn, mock interviews on your module, and your profile put in front of employers we talk to.

What is included

- Around 50 hours of live, mentor-led training (weekday or weekend batch)
- 24x7 S/4HANA server access with your own login, so you practise from home
- End-to-end live project on real business scenarios, not slide theory
- Doubt support outside class hours, including evenings and weekends
- Configuration notes and step documents you keep after the course
- CV rewritten the way screening software and recruiters actually read it
- LinkedIn profile rewrite, step by step
- Mock interviews on your module, with the questions that actually get asked
- Guidance and booking help for the official SAP certification exam
- Online or offline (Hebbal, Bengaluru), and you can switch mode

Programmes

Programme

Foundation Workshop

2-day SAP introduction. Try before you commit.

Flagship Module Training MOST POPULAR

2 months, around 50 hours, live projects, career support.

1:1 Private Track

Private pace, fully personalised mentoring.

SAP Project Support

Already on a live SAP project? On-demand expert help, charged by the hour, with a discounted block of hours available.

Fees and instalment options are confirmed on a call, because the right programme depends on your background. Message us and we will send them the same day.

Certification

You are training towards the SAP associate certification C_TS422, covered earlier in this brochure. We prepare you against SAP's current syllabus and help you register. The exam is set, run and priced by SAP, and is separate from the course fee.
